Segment financial performance

- Investment properties income growth from improvement in office occupancy offset by retail and logistics divestments
- Significant growth in income from co-investments driven by Perron partnership assets
- Management operations uplift reflects part period impact of new assets under management, offset by lower fees from asset devaluations
- Trading profits of \$13.9 million associated with asset divestments
- Net finance costs increase due to 50 basis points higher weighted average cost of debt
- Income tax expense increased due to higher management operations and trading profits
- Maintenance and leasing capex skew to second half, expected to be \$160-170 million for CY 2025 due to higher office leasing
